April 25, 2013

## **Abstract**

Cloud computing has been very active in both academia and industry field for several years. Major cloud computing vendors, like Amazon, Google and Dropbox, have provided users and businesses many advantages such as reliable and convenient storage, elastic computing power, and simple application deployment, lower IT infrastructure cost, etc. In 10 years, I will expect cloud computing's influence far beyond the current achievements, but deeply inside mobile technology, scientific computing, massive online education and online-to-offline market. In this essay, I will discuss this point with my observations and understandings.

- 1 Introduction**
- 2 Mobile Computing and Cloud Computing**
- 3 Massive Open Online Courses and Cloud Computing**
- 4 Scientific Computing and Cloud Computing**
- 5 Online-to-Offline Market and Cloud Computing**
- 6 Conclusion**
